

**MFC0004 Misty Air Service Floats**

This is the rest of the Ketchikan trip- All floats. Again you are in prime RTMM scenery. We will continue to explore many different areas from great fishing spots, outlying/remote cabins, seaplane bases as well as rugged natural scenery: Harbors, rivers, gorges, mountain ranges and more all in a radius area of @ 100 nm from Ketchikan SPB. On our trip, it is our task to transport fishermen to the outlying areas for some prime Halibut, Salmon and bottom fishing – accessible by water hence this is strictly a sea plan base operation. Note: each flight leg has one stop-over location which is also a water mooring.

**Aircraft:** Float plane or amphibian is required and since we are site seeing this scenic area along the way as we transport the fishermen to various locations: “low & slow” is the only way to go! The aircraft must be a single engine non-turbo prop fixed wing: IE: DHC2 Beaver Float/Amph\*, Cessna C185, or equivalent. For helicopter pilots: If you prefer a rotorcraft, go for it. Bush chopper must be equipped with floats (non-military) only.

Tour Download for this excursion is available in the Tour downloads section at RTMM which contains the all the tour details, sky vector map links as well as the award for completion. Make sure you obtain the tour download for all of the tour specifics.
