

### MFC0024 Kodiak Island to Wasilla

Kodiak Island, sitting off the Southern coast of Alaska in the Kodiak Archipelago, is home to the city of Kodiak, Alaska's largest fishing port, famous for catches of king crab and salmon. The island is also home to the Kodiak National Wildlife Refuge, which takes up almost two-thirds of the island and protects populations of Kodiak brown bears, all six species of Pacific salmon and 250 species of birds. With a lovely temperate marine climate, Kodiak promises outdoor fun, all year long. On this short excursion, we'll explore this large island.

**Aircraft:** This is another low and slow adventure so the aircraft used must be a single engine fixed wing standard prop Amphibian as landing locations vary from land to water moorings.

All of these flights are short so a single prop or multi is recommended: Aircraft IE: C185, DHC2, DHC3, DHC6, Beech 18 etc. Most of the RTMM bush planes work here EXCEPT on the first two legs: Legs 1 and 2: MUST BE AN AMPHIBIAN as there are water moorings. (All the remaining and following legs are land moorings) Similarly helo pilots: do your thing in a helicopter but you require a floats version on the first two legs.

**This excursion has 13 Legs but lots of stops around the island and on mainland Alaska on the way to Wasilla.**

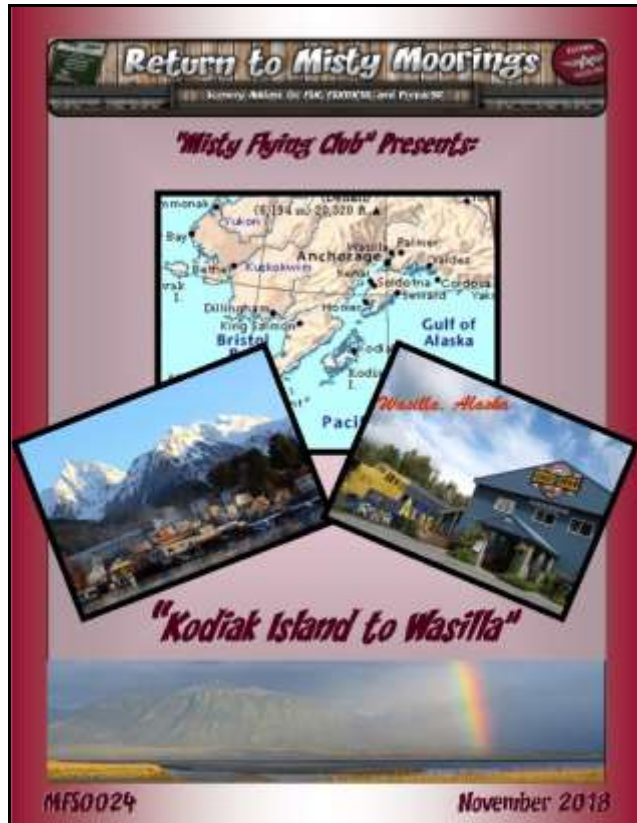

**Tour Flight Leg Rating Conditions: Level 1/Easy-"6Ax":**

**6=Max landing rate is -600fpm,**

**A=Autopilot and/or GPS use permitted.**

**x-# of Stop-overs in the flight leg\*. (Note: \*There are legs with one or two stop-overs as well as other legs with no stops. What the flight legs closely as you progress through the excursion.**

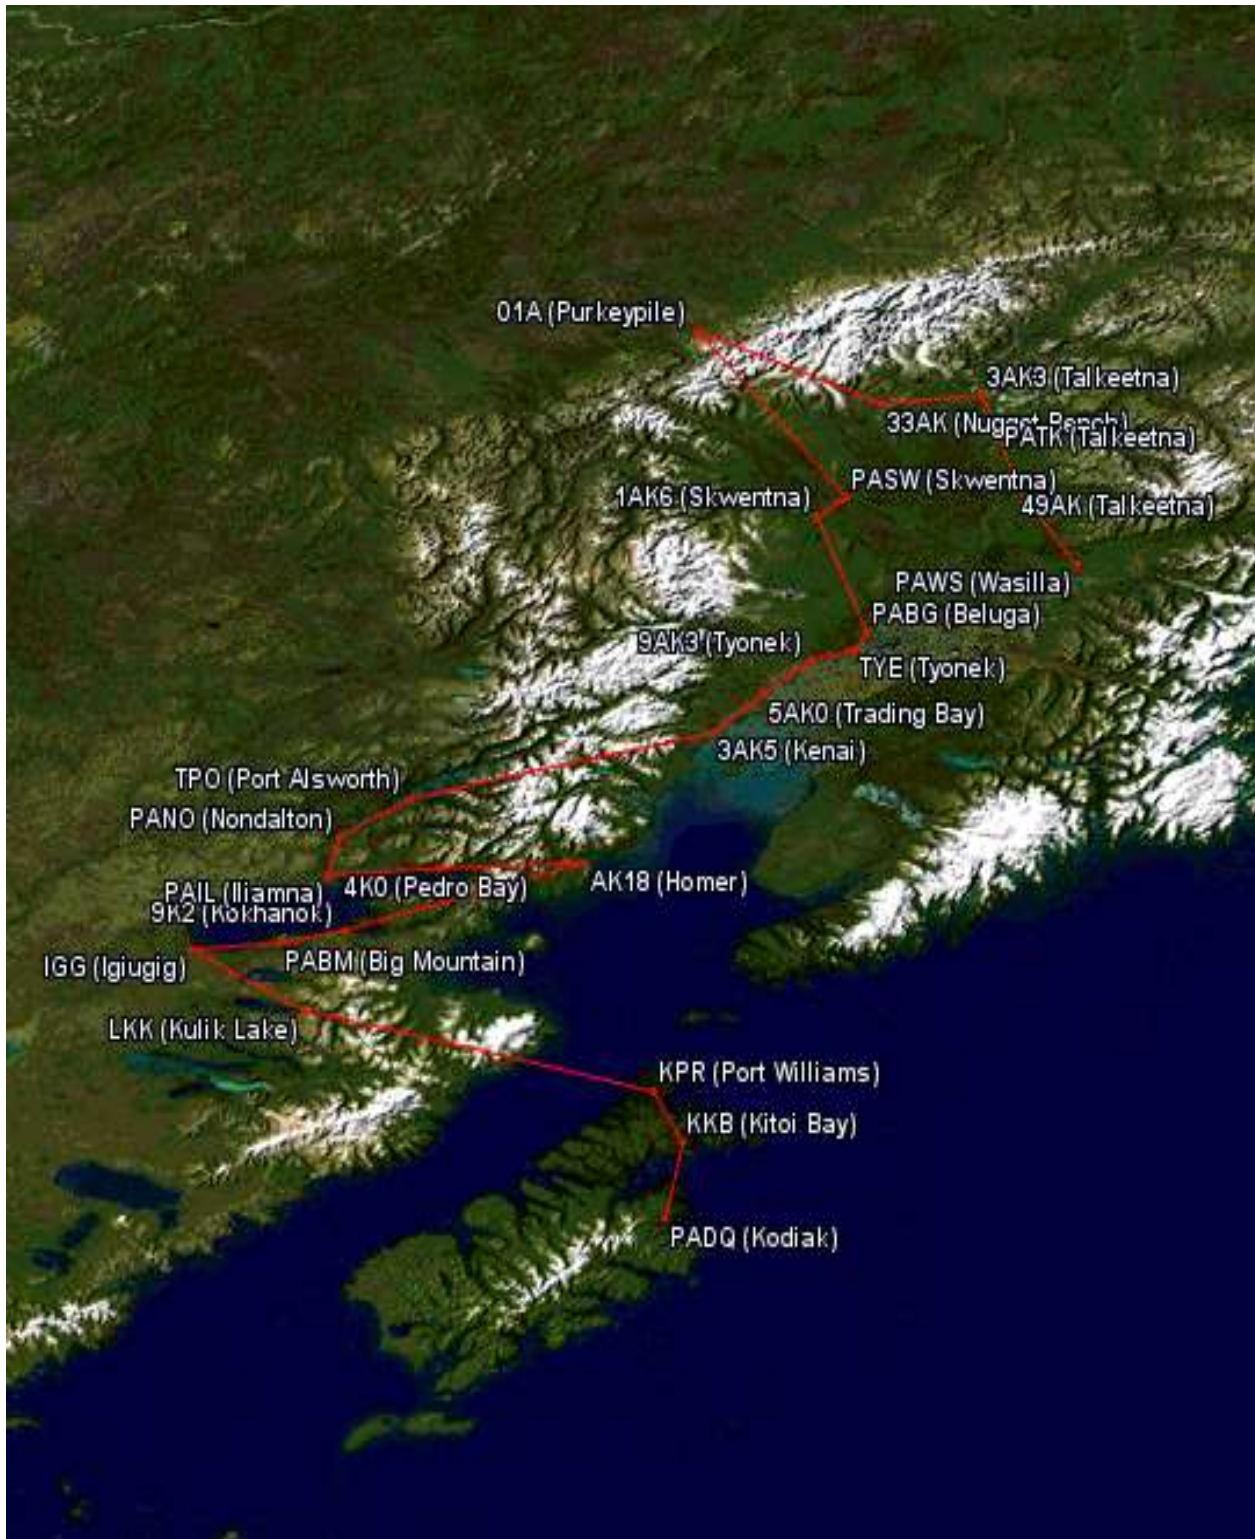

The Tour download for this excursion is available in the Tour downloads section which contains the all the tour details, stop-over locations, sky vector map links as well as the award for completion so make sure you obtain the tour download for all of the tour specifics.

## MISTY FLYING CLUB – MFC0024 KODIAK ISLAND TO WASILLA: TOUR CONDITIONS

**Conditions/Restrictions to successfully complete this VA Exploration:**

There is only the one restriction that applies while flying the flight legs of this tour. All landings, including stop-overs, must not exceed a landing rate of greater than -600fpm.

This level of flying if performed under VFR\* rules and regulations brings some realism if you use no automatic piloting features. These flight legs indeed become more of a challenge for all of us for navigation. Skyvector static maps are provided for those who wish to try to fly/navigate by use of dead reckoning, land marking etc. (The sky vector map links utilize natural and manmade landmarks plus time, distance, speed, direction as well as VOR and NDB for nav.). Standard .pln FP files are also provided so you can fly the route as per the flight plan prepared which include all the airport locations as well as all the waypoints.

## MISTY FLYING CLUB – MFC0024 KODIAK ISLAND TO WASILLA: FLIGHT LEG DETAILS

Leg: #	Departure Airport Name/ ICAO  (SPB* are water Moorings)	Stop-over Locations/ ICAO  (SPB* are water Moorings)  * All stop-over landing rates, where applicable, are accepted up to a max of -600fpm.	Destination Airport Name/ICAO  (SPB* are water Moorings)	Airline ID	Flight # (*):  * All destination landing rates are accepted up to a max of -600fpm  Autopilot NOT recommended  ***** (*) For Tour Leg use the Tour Center generated Flight legs#. If flying the single legs use flight # as listed below in KaCars:	Aircraft	Distance  (Nautical Miles)	Min Alt (VFR)  (Feet)
1	Kodiak (PADQ)	Kitoy Bay SPB* (KKB)	Port Williams SPB* (KPR)	MFC	T00270-6A1	DHC6 AMPH	47.5	4500
2	Port Williams SPB* (KPR)	OPTIONAL: (McNeil River Camp* (MCN) (WATER) (*Un-marked but it is in McNeil Cove)	Kulik Lake (LKK) (PAKL)	MFC	T00271-6A1	DHC6 AMPH	94.6	6500
3	Kulik Lake (LKK) (PAKL)	Igiugig (IGG) (PAIG)	Big Mountain (37AK) (PABM)	MFC	T00272-6A1	DHC6	56.5	3500
4	Big Mountain (37AK) (PABM)	Kokhanok Airport (9K2) (PFKK)	Camp Point (AK18)	MFC	T00273-6A1	DHC6	82.1	3500
5	Camp Point (AK18)	Pedro Bay (4K0)	Iliamna (PAIL)	MFC	T00274-6A1	DHC6	90.7	10500
