As we are in the prime RTMM scenery area, RTMM Scenery adds many, many scenery enhancements. Most are familiar with this scenery at Alaska Adventures but those who may not be familiar all of the RTMM all of it surely enhances the sim and would recommend all of it and it's freeware from a great bunch of sim scenery designers.

RTMM Scenery Object Libraries: RTMM Page: ***http://return.mistymoorings.com/object_libraries_build/index.php#links ****

Download and install RTMM Objects Libraries and add each to Sim scenery in order (Keep the libraries separate from each other): these object libraries are:

1. RTMM Object Libraries – Part I, Part II, Part III (extract, compile, as required - add scenery to sim - first)
2. RTMM Medical & APP Library – (extract move/folders Effects, Scenery as required - add to sim scenery second)
3. RTMM BWEP Library – (extract move/folders as required - add to sim scenery third/last)
      (NOTAM: If you previously had the MED TEMP and the APP TEMP Libraries installed remove/deactivate them from your sim scenery then remove the add-on scenery folders/files before installing the new combo RTMM Medical & APP Library)

This is a huge excursion with many, many RTMM custom add-on pieces and POI locations ([http://www.return.mistymoorings.com/scenery/)](http://www.return.mistymoorings.com/scenery/)
