

**Misty Flying Club – MFC0039 Bowerman to San Diego CA**

Continuing from the previous Bowerman Hub Excursion we head for the south down the USA West coast. Destination San Diego CA.

If you have them, turn on all your NA ORBX Regions ORBX regions – PNW, NCA and SCA and ORBX NA payware airports as well as the freeware FTX Global Airports. We visit all the surrounding ORBX airports: Freeware and Payware enroute to San Diego (KSAN). If you don't have all or any, no worries as the defaults work fine.

We are out of RTMM add-ons but we'll return later after several excursions in the USA Rockies areas.

One more thing, all landings in this excursion are on runways: there are none on water: so for an added dimension we can use wheeled aircraft. This one set for the Beech 18 twin but can use any as you wish. And again, an amphibian is NOT required so this opens up many more aircraft if you want to try them.

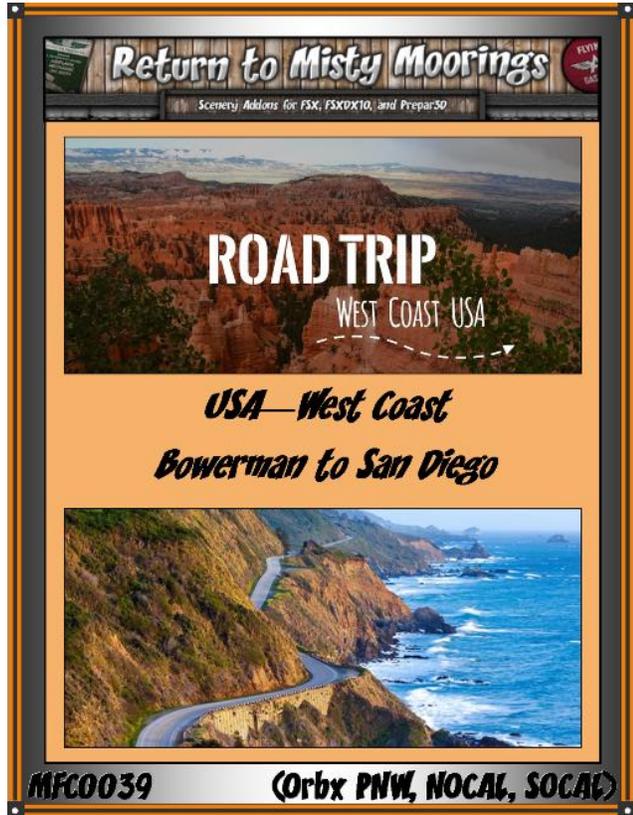

-----  
This excursion has 19 legs and all are land moorings

Each flight leg has one or two stop-overs (intermediate stops) and we will visit travel over most of the POI in this coastal trip and hit all the ORBX airports along the way.

Aircraft: Any MFC Fleet aircraft or helicopter. (BE18 twin makes a nice change!).

Tour Flight Leg Rating Conditions: "6A1 or 6A2"  
6=Max landing rate is -600fpm,  
A=Autopilot and/or GPS use permitted: (but not recommended).  
1 or 2-# of Stop-overs in the flight leg\*. Each leg of this trip has 1 or 2 stop-overs. (Mostly one stop in each leg).  
Watch the flight legs closely for the stop-over locations.

The Tour download for this excursion is available in the Tour downloads section which contains the all the tour details, scenery requirements, stop-over locations, flight plans, skyvector map links as well as the award for completion so make sure you obtain the tour download for all of the tour specifics.

**MISTY FLYING CLUB – MFC0039 BOWERMAN TO SAN DIEGO: THE ROUTE:**

This is prime PNW, NOCAL and SOCAL down the west coast of the USA!. In the next few excursions we will visit to almost all the ORBX airports in these areas. (In the table Flight leg details below have indicated whether an airport has an ORBX payware or freeware airport or it is non-ORBX. We will travel almost 1500 nm in this trip.

MISTY FLYING CLUB – MFC0039 BOWERMAN TO SAN DIEGO: TOUR CONDITIONS

**Conditions/Restrictions to successfully complete this VA Exploration:**

There is only one, well two restrictions that applies while flying the flight legs of this tour. All landings, including stop-overs, must not exceed a landing rate of greater than **-600fpm**. In this excursion there are one or two stop-overs in each of the flight legs (Most legs have only the one mid stop). Remember all stop-over landings as well as the final destination landing all must be -600 fpm or under!! And of course PLEASE DON'T CRASH! Our aircraft are very expensive to fix and/or replace and we sure don't want any injured MFC pilots!

MISTY FLYING CLUB – MFC0039 BOWERMAN TO SAN DIEGO: FLIGHT LEG DETAILS

Leg:	Departure Airport Name/ ICAO	Stop-over Locations/ ICAO	Destination Airport Name/ICAO	Airline ID	Flight # (*):	Aircraft	Distance	Min Alt (VFR)
#	Departure  Autopilot NOT recommended  (ALL land moorings)	* All stop-over landing rates, where applicable, are accepted to a max of -600fpm.
