

MFC0042 Rockies-2

Monument Valley-Eagle Co Regl CO to Sedona AZ

In this mountain chain there are many scenic landmarks, one being Monument Valley, a red-sand desert region on the Arizona-Utah border which is known for the towering sandstone buttes of Monument Valley Navajo Tribal Park. We will explore this area and many other scenic landmarks winding through the landscapes from Eagle Co Regional Airport in Colorado southward to Sedona AZ.

This series continues as we slowly work back to RTMM land. As we explore we'll visit the Canyons and the Rocky Mountain chain: Full of natural scenic value as well as plenty of eye candy and in this trip Monument Valley.

We are just in "FTX Global" but for airports, the FTX freeware global airports package again contain most of the airports that we are going to cover in this and following excursions. There is a couple of ORBX Pays but the default airports are adequate).

All landings in this excursion are on fairly nice runways. There one stop in each leg, and there are only nine slightly longer legs to this excursion as we make our way from County Regional Airport located in Eagle Colorado to Sedona Arizona through a very scenic landscape.

Since these legs have a bit more distance and variable terrain, a larger twin aircraft might be a nicer ride: IE: AC50, BE18, BT67, C-47, DC-3, DHC6 even OR even bigger singles IE: C208, DHC2 Beaver etc. might fit the bill.

I have set this up to show the de Havilland Canada DHC-6 Twin Otter (Turboprop) which I plan to use: It's a nice heavier duty aircraft twin engine powered but, as always, you can use any prop aircraft or helicopter that resembles an aircraft in the fleet! (Floats or amphibians are not necessary in this excursion!!)

Tour Flight Leg Rating Conditions: "6A1"

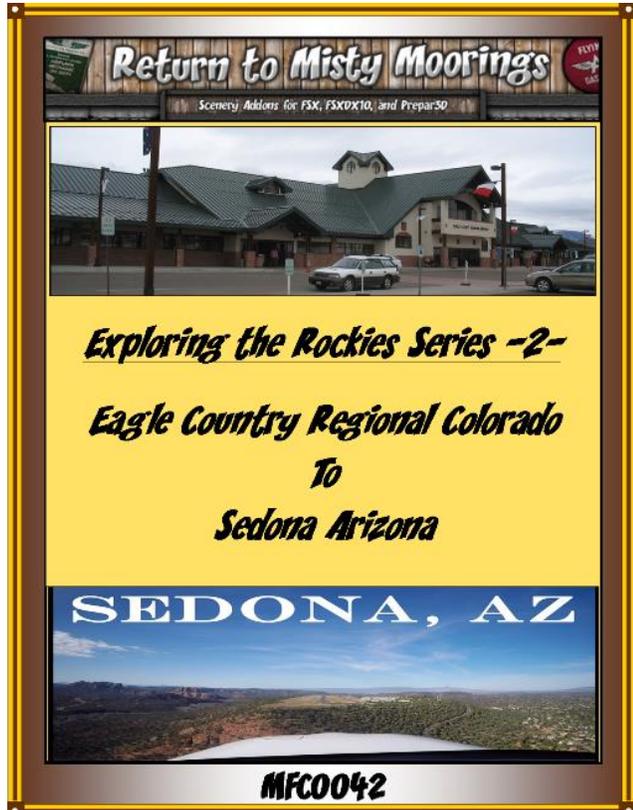

6=Max landing rate is -600fpm,

A=Autopilot and/or GPS use permitted: (but not recommended).

1=# of Stop-overs in the flight leg*. Each leg of this trip has 1 stop.*

*Watch the flight leg details/tour doc closely for the stop-over locations in each leg.

The Tour download for this excursion is available in the Tour downloads section which contains the all the tour details, scenery requirements, stop-over locations, flight plans, sky vector map links as well as the award for completion so make sure you obtain the tour download for all of the tour specifics.

MISTY FLYING CLUB – MFC0042 ROCKIES 2-MONUMENT VALLEY-EAGLE CO REGL CO TO SEDONA AZ: TOUR CONDITIONS

Conditions/Restrictions to successfully complete this VA Exploration:

All landings, including stop-overs, must not exceed a landing rate of greater than **-600fpm**. In this excursion there are one or two stop-overs in each of the flight legs. Remember all stop-over landings as well as the final destination landing all must be -600 fpm or under!!
 Have an eye on your other operational practices and try to adhere to the aircraft tolerances of the aircraft you are flying: IE over-speed conditions, over speed flaps/gear use etc. as they can cause major damage to the aircraft. And of course PLEASE DON'T CRASH! Aircrafts are very expensive to fix and/or replace and we sure don't want any injuries to our MFC pilots! Enjoy the trip in this area!

MISTY FLYING CLUB – MFC0042 ROCKIES 2-MONUMENT VALLEY-EAGLE CO REGL CO TO SEDONA AZ: FLIGHT LEG DETAILS

Leg:	Departure Airport Name/ ICAO	Stop-over Locations/ ICAO	Destination Airport Name/ICAO	Airline ID	Flight # (*):	Aircraft	Distance	Min Alt (VFR)
