

MFC0043 Rockies-3
The Grand Canyon
Sedona AZ to McCarran Intl NV (KSEZ-KLAS)

One of the world's natural wonders, the iconic Grand Canyon draws awed visitors perched at the edge of its towering cliffs.

The Grand Canyon continues to be a landmark that draws several millions of visitors every year. The iconic rock matter found there dates back to approximately two billion years, and the nearly 300 miles of land hold around 70 different species of animals.

Touring the Grand Canyon is an experience like none other. Now imagine flying over the expansive canyons in a small plane or helicopter? It will give you a new perspective on one of the most amazing natural wonders in the world. This excursion explores the ins and outs of the Grand Canyon which is a natural wonder.

We are "FTX Global" and for airport scenery, the FTX freeware global airports package again provides a few of the airports that we are going to cover in this and following excursions. There is also a couple of ORBX Pays but the default airports are adequate). This trip focuses on travelling through the canyons.

All landings in this excursion are on fairly nice land runways. There are 18 weaving legs in this trip: 13 of which have one mid-stop and 5 legs that are direct (the legs have no mid-stops).

This is a very low and slow trip to really enjoy the scenery so were back to a single engine smaller aircraft which still have enough power to climb and to be able to navigate the twists and turns/up and downs of the canyons: IE: Cessna 170, 172, 182, 185 etc.

For the helicopter pilots out there a smaller helicopter will provide the ability to navigate this excursion.

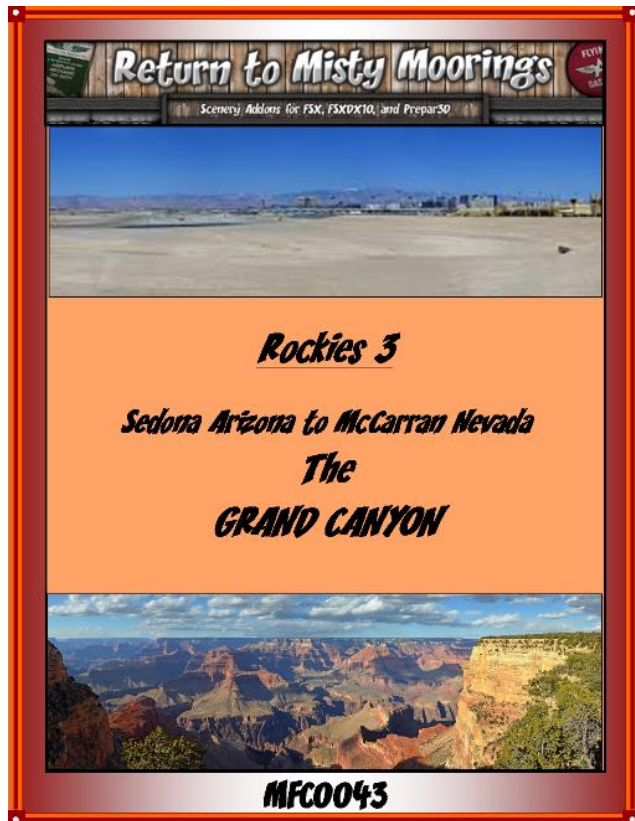

I have set this up to show the bush C185 which I plan to use. It is a light aircraft, has power and very is maneuverable – which we'll need travelling low and slow through the canyons.

(Floats or amphibians are not necessary in this excursion!!)

Tour Flight Leg Rating Conditions: "6A1" or "6A0"
6=Max landing rate is -600fpm,
A=Autopilot and/or GPS use permitted: (but not recommended).
1 (or 0) = # of Stop-overs in the flight leg*. (13 legs have one stop and 5 legs have no stops).

*Watch the flight leg details/tour doc closely for the stop-over locations in each leg.

The Tour download for this excursion is available in the Tour downloads section which contains the all the tour details, scenery requirements, stop-over locations, flight plans, sky vector map links as well as the award for completion so make sure you obtain the tour download for all of the tour specifics.

ISTY FLYING CLUB – MFC0043 ROCKIES 3-GRAND CANYON-SEDONA AZ TO MCCARRAN INTL NV: TOUR CONDITIONS

Conditions/Restrictions to successfully complete this VA Exploration:

All landings, including stop-overs, must not exceed a landing rate of greater than **-600fpm**. In this excursion there are one or two stop-overs in each of the flight legs. Remember all stop-over landings as well as the final destination landing all must be -600 fpm or under!!

Have an eye on your other operational practices and try to adhere to the aircraft tolerances of the aircraft you are flying: IE over-speed conditions, over speed flaps/gear use etc. as they can cause major damage to the aircraft. And of course PLEASE DON'T CRASH! Aircrafts are very expensive to fix and/or replace and we sure don't want any injuries to our MFC pilots! Enjoy the trip in this area!

MISTY FLYING CLUB – MFC0043 ROCKIES 3-GRAND CANYON-SEDONA AZ TO MCCARRAN INTL NV: FLIGHT LEG DETAILS

Leg:	Departure Airport Name/ ICAO	Stop-over Locations/ ICAO	Destination Airport Name/ICAO	Airline ID	Flight # (*):	Aircraft	Distance	Min Alt (VFR)
