These are great enhancements for eye candy but are not mandatory to fly this excursion as it can be flown with default terrain and default airports.

We'll back into RTMM territory in a few excursions- that is after exploring the Rockies!

RTMM Scenery: <http://return.mistymoorings.com/>

RTMM Scenery Object Libraries: RTMM Page: http://return.mistymoorings.com/object_libraries_build/index.php#links *

RTMM Add-on Scenery Pieces: (<http://www.return.mistymoorings.com/scenery/>) (Note: Over time, It's best to just add all of the RTMM add-on scenery locations as eventually we are going to explore all of them!!!!)

I'm sure there are many more "other" add-ons out there that won't interfere while flying this excursion.

If you have any questions, issues or problem setting up your scenery, just let us know via forum post or direct email and we will be glad to assist you.
