

**MFC0051 Rockies 11-Pitt Meadows BC to Owikeno S Strip BC (CYPK-PF55)**

We continue northward in our Rocky mountain journey (#11) from Pitt Meadows BC (CYPK) back into RTMM Territory at Owikeno S. Trip (PF55).

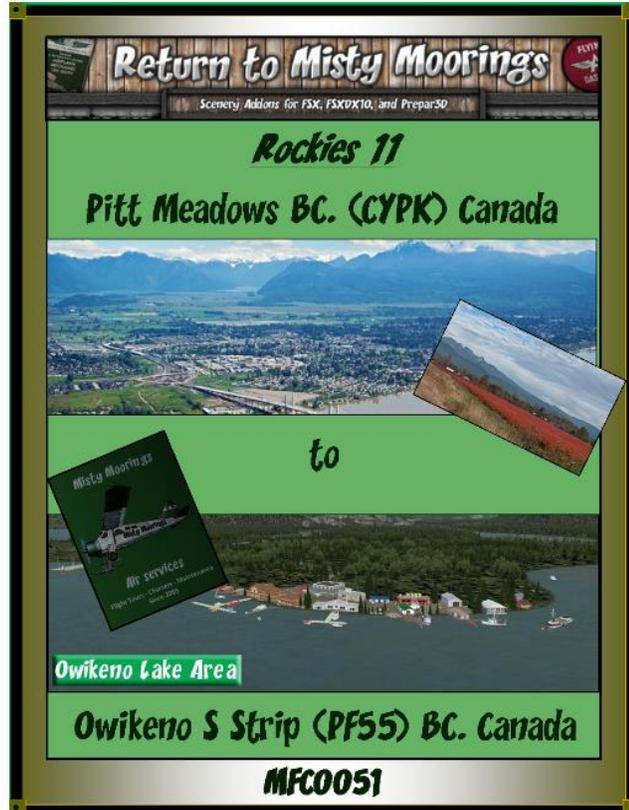

The legs in this trip are relatively short and even though we are in mountain territory the routes take us through the lower mountain valleys so there is not too much climbing. This gives opportunity to use a lighter aircraft: perhaps an ultralight type aircraft or a small single engine lighter aircraft than we used in previous trips in the mountains.

All landings in this excursion are again land runways: NO WATER! There are 10 legs in this trip: all direct- NO STOPS.

Recommendation is a light single engine standard: Perhaps an ultralight: IE: Icon A5 or a light single engine aircraft IE: Piper Cub: J-3 or PA-18, Cessna 140/152/172 or other smaller type aircraft definitely will make these flight legs a challenge. For the helicopter pilots out there, a less rugged or lighter helicopter will do just fine to be able to navigate this excursion. (It's been a while but think I'll try to fly the J-3 cub but feel free to use your aircraft or helicopter of choice.

Tour Flight Leg Rating Conditions: "6A0"  
6=Max landing rate is -600fpm,  
A=Autopilot and/or GPS use permitted: (but not recommended).  
0=# of Stop-overs in the flight leg\* (No stops!).

The Tour download for this excursion is available in the Tour downloads section which contains the all the tour details, scenery requirements, stop-over locations, flight plans, sky vector map links as well as the award for completion so make sure you obtain the tour download for all of the tour specifics.

**MISTY FLYING CLUB – MFC0051 ROCKIES 11-PITT MEADOWS BC TO OWIKENO S STRIP BC (CYPK-PF55): TOUR CONDITIONS**

**Conditions/Restrictions to successfully complete this VA Exploration:**

All landings, including stop-overs, must not exceed a landing rate of greater than **-600fpm**. In this excursion there are one or two stop-overs in each of the flight legs. Remember all stop-over landings as well as the final destination landing all must be -600 fpm or under!!

Have an eye on your other operational practices and try to adhere to the aircraft tolerances of the aircraft you are flying: IE over-speed conditions, over speed flaps/gear use etc. as they can cause major damage to the aircraft. And of course PLEASE DON'T CRASH! Aircrafts are very expensive to fix and/or replace and we sure don't want any injuries to our MFC pilots! Enjoy the trip in this area!
