

# Tongass Fjords Docks

## Part A

Welcome to Part A of a two part series for Tongass Fjords Docks. The docks in this package are the following:

TF01 Cape Decision Lighthouse  
TF02 Corner Bay Dock  
TF03 Biorka Island Dock  
TF04 Edna Bay Dock  
TF05 Five Finger Lighthouse  
TF06 Frederick Point VOR Dock  
TF07 Institute Creek Marina Dock  
TF08 Labouchere Dock  
TF09 Naukati Bay Dock

I have tried to create the docks to be as close to the real ones as possible, using the “ghost” images we see in the Google Earth satellite photos. Most are very close. There are three exceptions to this:

1. Cape Decision Dock – Now well-described by satellite or photos and very difficult FS2020 geography for placement. This one will work for simmers having fun, but it is (probably) not at all like what is there.
2. Frederick Point VOR Dock – This one is not well-described nor were there any photos found of it. Google Earth does not portray an image we could use. So we used our imagination a little on this one.
3. Labouchere Dock – This also has no pictures on the internet, nor does it show usable ghost images in the Google Earth Satellite view. We did find a pdf discussing the Labouchere Dock site and area. There was a pulp mill/saw mill in the bay and that is now defunct. The environmentalists have found toxic levels of oil and other hazardous materials (probably just above the allowed levels for ice cream, but good enough to throw a lot of tax dollars at). So they are doing a “hazardous waste” cleanup at the site. Here again, I used a little imagination and created something you would enjoy visiting.

Other than the three mentioned above, the rest are very true to “real”. Here is an example for Naukati Bay. You can clearly see the white “ghost” images and how I covered them. There is a difference in satellite photos, one shows the “fueling dock” as vertical to the shore, a second photo shows it larger and horizontal to the shore ... with an additional pier to the north. This was the latest photo, so this is the one I duplicated. You'll see the differences in the before/after screenshots below:
