

# Hoonah Ranger District USFS Cabins - Group 10

Doug Linn

**WELCOME** to the Hoonah Ranger District USFS Cabins group. There are only 5 cabins in this small group.

**Bohemia Basin Shelter - BOHB - #1** - This is an Adirondack-style shelter, a very rough little structure that is actually open in the front. For this location, there is a paved road on the shoreline nearby. The shoreline was all cliffs, they were all flattened and reforested.

**Eight Fathom Cabin - EFU1 - #2** - A saltwater cabin located 15 miles from the City of Hoonah, Alaska in the protected waters of Port Frederick. It is a rustic 15'x17' milled log style cabin built on the shore of Eight Fathom Bight with a beach access trail and a mooring buoy. It is only accessible by floatplane or boat. The cabin can accommodate 8 people and is equipped with wooden bunks, tables, benches, and a full sleeping loft. The beach access trail, first-level floor, outside deck, and outside toilet is ADA accessible. The shoreline was a cliff, was flattened.

**Greentop Cabin - GTOP - #3** - A rustic 2 story log cabin built in the 1940s on the outer coast of Yakobi Island protected from the Pacific Ocean by Greentop Harbor. Saltwater access only. Rugged rocky coastline with abundant seashore life and beautiful scenery of West Chichagof Yakobi Wilderness. Wildlife in this area includes deer, brown bears, and sea otters. Excellent opportunities for sea kayaking and boating in the numerous coves and protected bays. An interesting place for people to find. Had to do a cliff flatten in the area.

**Kennel Creek Cabin - KEUC - #4** - This is a more up-scale cabin with a vault toilet (a tank that is manually emptied). The firewood is provided as are other amenities. It is very near a paved road for easy access. I had to do some work on the cove, it was only half full of water, and there were cliffs along the shoreline. There is a peninsula nearby that houses a small dock where people can put their boats into the water.

**Pinta Cove Shelter - P CUS- #5** - This is an Adirondack style shelter, a very rough 3 sided enclosure that is actually exposed to the elements (and the wildlife) in the front. This took very little work to do, the geography and terrain were fine.
