

### MSFS Scenery Requirements MFS0021 The Gulf of Mexico - Johnson TX to Key West FL

#### Add-on Scenery:

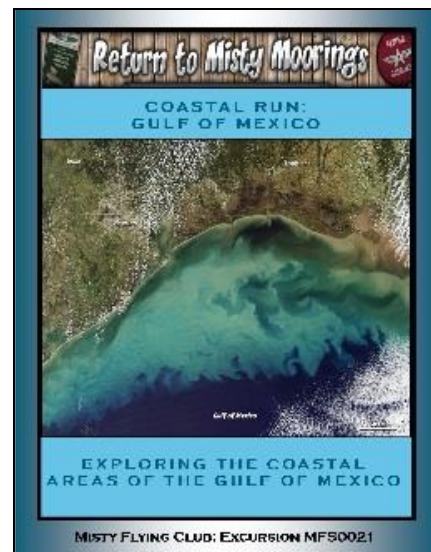

Being outside of the RTMM operating area, this is a “find your own add-on scenery if you want it” task but generally add-on scenery in MSFS it is not required. In this excursion, all of the locations are default so there is no special scenery required to generate any airport locations.

If you do want to search on [flightsim.to](https://flightsim.to) (or other) to add upgrades or already have some nice “eye candy” add-ons for these areas please feel free to turn them on.

#### Freeware Site:

[Flightsim.to](https://flightsim.to): The most popular MSFS Add-ons site.

Recommend: MSFS Add-on Linker - [Flightsim.to](https://flightsim.to) [LINK](#) (to easily and safely organize your mods)
