FSX-P3D Scenery Requirements MFS0021 The Gulf of Mexico - Johnson TX to Key West FL

We're definitely out of RTMM territory but we're following an interesting route and flying in very nice scenic areas.
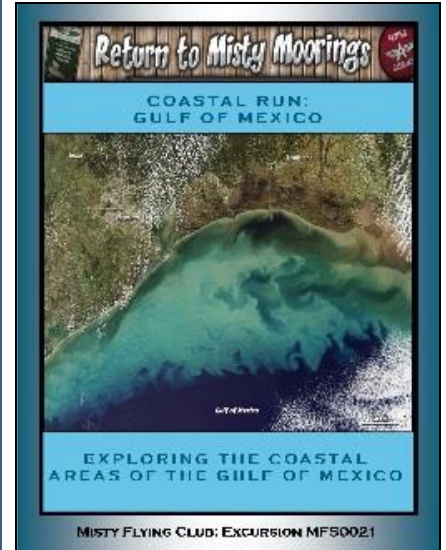

Add-on Scenery:

Orbx products that are nice add-ons for FSX/P3D: (Not-Mandatory):

Orbx LC NA,
Global Base,
Global Vector,
Global Airport Pack (Freeware) as well as other freeware add-ons for this area.
(Ensure you get the correct versions for your sim).

Being outside of the RTMM operating area, this is a "find your own add-on scenery if you want it" task but generally add-on scenery in MSFS it is not required. In this excursion, all of the locations are default so there is no special scenery required to generate any airport locations.

If you do want to search to add upgrades or already have some nice "eye candy" add-ons for these areas please feel free to turn them on.
