

MFS0030 HEADING HOME KPWT-PF20

This trip continues from Bremerton Washington (KPWT) to Misty's Place (PF20) in Alaska.

We're finally heading home into RTMM territory after travelling in foreign lands around other parts of North America for the last several excursions. It was nice to see some other parts of the world but it's always nice to come home!

The Excursion:

This is intended to be a low level flight excursion – Amphibian flight visit RTMM and other POI on the home to Misty's Place including the RTMM lighthouse locations with water moorings as well as helipads. The flight legs, for the most part in this excursion are all under 80 nm but are a mix of land and water moorings so an amphibian craft, either fixed wing or helicopter can be used.

Aircraft:

Speed of aircraft is best around 80-120 to be able to enjoy the site seeing aspect and an amphibious craft for fixed wing or floater helicopters. There are helipads at most of the lighthouse locations.

As far as fixed wing aircraft is concerned: single engine standard (non-turbo) or will fit the bill and as always, please feel free to use your craft of choice from the fleet. I expect to run a single engine prop like the Beaver for this trip but please use your aircraft of choice.

SIM:

MSFS, FSX, P3D.

Time/Weather:

If possible try live time and live weather. If not possible set your own weather and time parameters and enjoy the scenery. (Dawn or Dusk are the nicest times to fly and can yield very pretty and interesting lighting effects).

Add-on Scenery:

There are lots of "eye candy" add-ons out there for this area- payware and/or freeware). Feel free to use any add-on or scenery pieces for the locations covered in this excursion but the only mandatory add-ons is the **RTMM Add-on Scenery!** (Single pieces Required: RTMM Libs, BC Lighthouses, Alaska Lighthouses, SPB packages, Misty's Place but there are also other locations that have been "RTMM" enhanced.

Recommend the RTMM Add-on express pack for your sim(s) which is a quick, easy to install and complete RTMM all-in-one scenery package.

The all-in-one express RTMM Add-on Scenery package download for MSFS2020: https://return.mistymoorings.com/z20_homepage/index.php

The all-in-one complete RTMM Add-on Scenery package downloads for FSX, FSX-SE, P3Dv1-2-3-4-5: https://return.mistymoorings.com/s_install/index.php

We're heading home into RTMM after travelling around in other parts of North America. It is nice to see some other parts of this continent world but it's always nice to come home!

Tour Landings: Max landing rate is -600fpm or under for all landings.
