

MFS0036A DEADHORSE HUB TOUR

This excursion begins and ends at Deadhorse, PASC (Prudhoe Bay) Alaska and covers the airports in the northwest quadrant of Alaska.

The Excursion:

This excursion is intended to be a low level flight excursion with multiple stops at various locations in the extreme north and west of Alaska.

The airports are all land based and medium or large sized.

Aircraft:

There are some long legs in this trip as well as some medium size legs. The legs range between 70-146 nm on average but there is one that is 215 nm). Your choice here, a medium or larger sized craft recommended such as a Bonanza or Baron, even a DC-3, DHC4 or DC-6. I plan to use a Caribou DHC4 for this trip)

As always, please use your aircraft or helicopter of choice and if required you can change to an alternate aircraft for any leg you wish by using the aircraft change feature in the cigar box aircraft section window.

SIM/ICAO Compatibility:

MSFS, FSX and P3D (all versions).

I have tried to use airports that have common ICAO to the various sims but you still may need to tweak them as required. NOTAM: (It is the route or journey that is important and not so much the exact airports used).

Time/Weather:

If possible try live time and live weather. If not possible set your own weather and time parameters and enjoy the scenery. (Dawn or Dusk are the nicest times to fly and can yield very pretty and interesting lighting effects).

Add-on Scenery:

MSFS:

The all-in-one express MSFS RTMM scenery:

https://return.mistymoorings.com/z20_homepage/index.php

(or download and setup all single pieces)

Plus:

<https://flightsim.to/file/14024/windy-things>

<https://flightsim.to/file/2549/edhk-lights-pack>

All Requirements FSX/P3D:

Software Necessary for RTMM Areas ... We recommend them in this order, but having all is best.

Tongass Fjords X: <https://forum.mistymoorings.com/index.php?board=22.0>

Orbx Requirements:

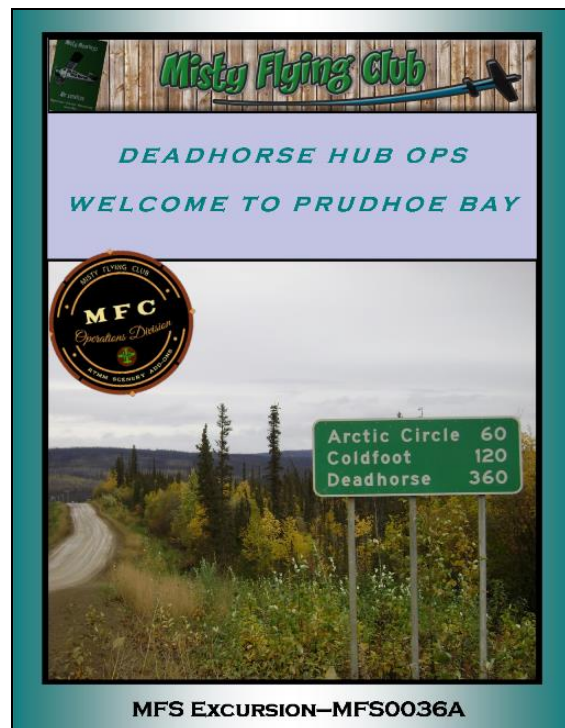

NA Pacific Fjords: <https://orbxdirect.com/product/pfi>

NA Southern Alaska: <https://orbxdirect.com/product/sak>

NA Pacific Northwest: <https://orbxdirect.com/product/pnw>

All-in-one complete RTMM Add-on Scenery package downloads for FSX, FSX-SE, and/or P3Dv1-2-3-4-5: https://return.mistymoorings.com/s_install/index.php
(or download and setup all single pieces) – Ensure the BWEP is active.

Tour Landings: Max landing rate is -600fpm or under for all landings.
